

Claims

1. A mobile telecommunications device including a browser to navigate between different pages and display information therefrom, and a key
5 operable in a first mode to navigate between previously visited pages and operable in a second mode to provide a display of previously visited pages whereby to permit the user to select a page from the display of previously visited pages and navigate directly thereto.

10 2. A device according to claim 1 wherein the key is operable to navigate backwards through previously visited pages.

3. A device according to claim 1 wherein the key is operable to navigate forwardly through previously visited pages.

15 4. A device according to claim 1 wherein the first and second modes are selected by operating the key for relatively short and long periods respectively.

20 5. A device according to claim 1 including a scrolling key operable to scroll a focus region through the display of previously visited homepages for selecting one of them.

25 6. A device according to claim 1 including a further key for selecting a homepage from the previously visited homepage display and so as to navigate directly thereto.

7. A device according to claim 1 and comprising a mobile telephone handset.

30 8. A device according to claim 1 and comprising a PDA.
